How your week works

A science-backed training system designed to maximise glute growth, strength and shape through smart exercise selection, progressive overload and a plan for every week. Each session has a specific purpose.

MON

Lengthened

Load the glutes in the **stretched** position. Slow lowering, own the bottom. Stretch under load is one of the strongest drivers of growth.

13 glute sets

TUE

Upper Sculpt

Shoulders, back, triceps and posture. **A** (push priority) on odd weeks, **B** (pull priority) on even weeks. Thursday works too.

+ abs

WED

Squeeze

Horizontal hip extension. Thrusts, bridges and back extensions for peak contraction and mind-muscle connection.

13 glute sets

FRI

Power

Heavy **vertical** hip extension. Your hardest session of the week, with two recovery days to follow.

14 glute sets

SAT · SUN

Recover

8–10k steps, 7–9 hours sleep, protein at every meal. Glutes grow between sessions, not during them.

Every glute session trains 5 patterns

Thrust & Bridge
peak contraction

Squat
deep, full range

Lunge
single-leg strength

Hinge
stretch + posterior chain

Abduction
side glute, shape

TEMPO KEY

Four numbers, in seconds: **Lower – Bottom pause – Lift – Top pause**.

3 **1** **1** **0**

= 3 sec down, 1 sec pause, 1 sec up, no pause at the top.

RIR — REPS IN RESERVE

RIR 2 = you could have done 2 more good reps.

Technical failure = the next rep would break your form. Stop there.

Each workout tells you how close to failure to train that week.

Your 12 weeks

Weeks 1–3	**Phase 1 · BUILD** Learn the movements, find your weights, build the base.
Week 4	**PR WEEK #1** **Test your three big lifts + pull-ups.**
Weeks 5–7	**Phase 2 · DEVELOP** New exercises, heavier loads, first intensity techniques.
Week 8	**PR WEEK #2** **Beat your Week 4 numbers.**
Week 9	**RELOAD or REMIX** Your readiness check decides: recover, or try something new.
Weeks 10–11	**Phase 3 · PEAK** Heaviest loads of the program. Leave nothing in the tank.
Week 12	**FINAL PR WEEK** **Show off 12 weeks of work.**

How to progress

ADD WEIGHT WHEN YOU EARN IT

When you hit the **top of the rep range on every set** with good form, add weight next session:

- Barbell & belt squat: **+2.5–5 kg**
- Dumbbells: **+1–2 kg** each hand
- Machines & cables: **+1 pin or plate**

Then build the reps back up. Can't add weight? Add a rep, slow the lowering or go a little deeper. Better than last time = progress.

LOG EVERY SESSION

Every exercise has **log boxes** for each week. Write the weight and reps of your best set, e.g. **60 × 10**.

No log = no overload. Your log is how you know you're getting stronger.

INTENSITY TECHNIQUES

- **Rest-pause:** rest 15 sec, max reps, rest 15 sec, max reps
- **Drop set:** drop ~25% and go again
- **Lengthened partials:** half reps in the stretch after your last full rep

> **Train with purpose. Focus on quality movement. Embrace progressive overload. Consistency is what builds stronger, fuller, more resilient glutes.**

PHASE 1

BUILD

Weeks 1–4

Learn the movements, find your working weights and build the base. Week 4 is your first PR Week.

MONDAY

BOOTY BLAST MONDAY - LENGTHENED

Phase 1 (Weeks 1-4)
Stretch-Mediated Hypertrophy

Focus

Today's session loads the glutes in their most lengthened position - deep in the hip. Training a muscle under tension while it's stretched is one of the strongest drivers of muscle growth. Slow the lowering phase, own the bottom position and make every rep count.

> **Control the stretch. Own the tension. Growth happens where ya willing to stay uncomfortable.**

WEDNESDAY

BOOTY BLAST WEDNESDAY - SQUEEZE

Phase 1 (Weeks 1-4)

Horizontal Hip Extension • Peak Contraction • Mind-Muscle Connection

Focus

Today the glutes work hardest at the TOP of every rep - the fully contracted position. Hip thrusts, bridges and back extensions load the glutes horizontally, where they are most active. Lighter than Friday, but every rep should feel like your glutes are doing ALL the work. This is the session that builds shape and the "shelf".

> **Squeeze with purpose. Feel every rep. If you can't feel it, you can't grow it.**

FRIDAY

FRIDAY BOOTY BLAST - POWER

Phase 1 (Weeks 1-4)

Vertical Hip Extension • Strength • Force Production • Progressive Overload · (Hardest session of the week - 2 full days of recovery on the weekend)

Focus

Today is the pinnacle of the training week. With two full recovery days ahead, this session is designed to maximise force production through vertical hip extension while accumulating quality volume across the entire glute complex.

Heavy loading first, accessory work second, glute isolation third, core finisher, metabolic burnout, then a brief recovery reset before you leave.

> **Today's work builds tomorrow's physique. Attack every set with purpose, embrace the challenge and earn your recovery. LFG!**

UPPER BODY SCULPT A

Vertical Push Priority - Phase 1 (Weeks 1 & 3)
Strength • Width • Shape

Session Type

Hypertrophy • Stability • Precision

Focus

Delts · Upper Back · Shoulder Width · Triceps Definition · *Minimal Chest

Wide shoulders change your silhouette more than any other muscle group - and make the waist look smaller. Train them with intent.

Tempo Structure

Every working set follows:

Lower → Bottom Pause → Lift → Top Pause

Default Tempo: 3-1-2-1

Objective

Begin with a heavy overhead press, then progress into shoulder width, upper back stability and triceps. Stable shoulders produce stronger lifts.

PR WEEK #1 · WEEK 4

★ PR WEEK

Run that week's normal workouts, with one change: each day has **one PR lift** that replaces its working sets. Every other exercise with 3 sets drops to 2 sets, so you're fresh to perform.

MONDAY

Barbell RDL

8-rep max

Bar to mid-shin or lower, neutral spine, 3 sec lowering, hips fully locked out.

WEDNESDAY

Barbell Hip Thrust

5-rep max

Shins vertical at the top, pelvis tucked, 1 sec pause at lockout.

FRIDAY

Belt Squat (wide sumo)

5-rep max

Hip crease to knee height or lower, controlled descent, full lockout.

UPPER B

Pull-Up

Max reps

Full hang to chin over bar, no kipping. Not there yet? Least assistance for 5 clean reps.

HOW TO RUN YOUR PR LIFT

1. **Ramp up:** 10 reps light → 6 @ ~50% → 4 @ ~70% → 2 @ ~85% of your target. Rest 90 sec–2 min.
2. **PR attempt:** up to 3 attempts at the target reps, 3–4 min rest. Stop as soon as a rep breaks form.
3. **Back-off set:** drop 15–20%, one set to RIR 1. Log it.

MAKE IT COUNT

Ring the PR bell. Write it on the board. Record it on your PR sheet at the back of this book.

Hip Thrust Club: 60 kg · 80 kg · 100 kg · 1× bodyweight · 1.5× bodyweight · 2× bodyweight.

Week 12 bonus: bodyweight single-leg glute bridge, max reps each leg.

PHASE 2

Weeks 5–8

New exercises, lower reps on the big lifts and heavier loads.
Week 8 is PR Week #2.

MONDAY

BOOTY BLAST MONDAY - LENGTHENED

Phase 2 (Weeks 5-8)
Stretch-Mediated Hypertrophy

Focus

New phase, new variations, heavier loading. We're still loading the glutes in their most lengthened position - the main lift (RDL) stays the same so you can keep building on it. Slow the lowering phase, own the bottom position and make every rep count.

> **Control the stretch. Own the tension. Growth happens where ya willing to stay uncomfortable.**

PR WEEK #2 · WEEK 8

★ PR WEEK

Run that week's normal workouts, with one change: each day has **one PR lift** that replaces its working sets. Every other exercise with 3 sets drops to 2 sets, so you're fresh to perform.

MONDAY

Barbell RDL

8-rep max

Bar to mid-shin or lower, neutral spine, 3 sec lowering, hips fully locked out.

WEDNESDAY

Barbell Hip Thrust

5-rep max

Shins vertical at the top, pelvis tucked, 1 sec pause at lockout.

FRIDAY

Belt Squat (wide sumo)

5-rep max

Hip crease to knee height or lower, controlled descent, full lockout.

UPPER B

Pull-Up

Max reps

Full hang to chin over bar, no kipping. Not there yet? Least assistance for 5 clean reps.

HOW TO RUN YOUR PR LIFT

1. **Ramp up:** 10 reps light → 6 @ ~50% → 4 @ ~70% → 2 @ ~85% of your target. Rest 90 sec–2 min.
2. **PR attempt:** up to 3 attempts at the target reps, 3–4 min rest. Stop as soon as a rep breaks form.
3. **Back-off set:** drop 15–20%, one set to RIR 1. Log it.

MAKE IT COUNT

Ring the PR bell. Write it on the board. Record it on your PR sheet at the back of this book.

Hip Thrust Club: 60 kg · 80 kg · 100 kg · 1× bodyweight · 1.5× bodyweight · 2× bodyweight.

Week 12 bonus: bodyweight single-leg glute bridge, max reps each leg.

WEEK 9

RELOAD / REMIX

Recover or remix. Your readiness check decides.

WEEK 9

Reload or Remix?

You've just finished 8 big weeks. At the end of Week 8, run this readiness check and tick each one that applies to you.

- [ ] Joints or tendons aching (hips, knees, low back)
- [ ] My main lifts went backwards two sessions in a row
- [ ] Soreness hanging around longer than 72 hours
- [ ] Sleep is worse than usual or life stress is high
- [ ] Motivation is flat, sessions feel like a grind

2 or more ticks

RELOAD WEEK

- Run your **Phase 2** workouts (Mon / Wed / Fri / Upper A)
- **Halve the sets** on every exercise (3 → 2, 2 → 1)
- Use about **70%** of your Week 8 weights
- **RIR 4**: leave feeling better than when you arrived
- Skip finishers: 10 min easy walk + mobility instead

A reload isn't going backwards. It's how you come back stronger for the Peak phase.

0–1 ticks

REMIX WEEK

- Run the **Remix** workouts on the next pages: new exercises for one week
- Upper day = **Upper A, Phase 3** as normal
- **RIR 2**: no failure, no PR attempts
- Have fun with it

FINAL PR WEEK · WEEK 12

★ PR WEEK

Run that week's normal workouts, with one change: each day has **one PR lift** that replaces its working sets. Every other exercise with 3 sets drops to 2 sets, so you're fresh to perform.

MONDAY

Barbell RDL

8-rep max

Bar to mid-shin or lower, neutral spine, 3 sec lowering, hips fully locked out.

WEDNESDAY

Barbell Hip Thrust

5-rep max

Shins vertical at the top, pelvis tucked, 1 sec pause at lockout.

FRIDAY

Belt Squat (wide sumo)

5-rep max

Hip crease to knee height or lower, controlled descent, full lockout.

UPPER B

Pull-Up

Max reps

Full hang to chin over bar, no kipping. Not there yet? Least assistance for 5 clean reps.

HOW TO RUN YOUR PR LIFT

1. **Ramp up:** 10 reps light → 6 @ ~50% → 4 @ ~70% → 2 @ ~85% of your target. Rest 90 sec–2 min.
2. **PR attempt:** up to 3 attempts at the target reps, 3–4 min rest. Stop as soon as a rep breaks form.
3. **Back-off set:** drop 15–20%, one set to RIR 1. Log it.

MAKE IT COUNT

Ring the PR bell. Write it on the board. Record it on your PR sheet at the back of this book.

Hip Thrust Club: 60 kg · 80 kg · 100 kg · 1× bodyweight · 1.5× bodyweight · 2× bodyweight.

Week 12 bonus: bodyweight single-leg glute bridge, max reps each leg.
